Talking Helps: An Evidence-Based Approach to Psychoanalytic Counseling (First Edition)

By **Dr. William Sharp**

Dr. Sharp will be signing copies, and he may have a 20% discount for people who want to buy the book at the party.

Talking Helps: An Evidence-Based Approach to Psychoanalytic Counseling is a unique textbook for those new to the mental health field and for those experienced with other forms of therapy. It introduces students to talk therapy and its importance as a viable researched treatment method. Second, the book prepares aspiring therapists to blend psychodynamic treatment with the approaches of community-based systems, particularly educational institutions.

Dr. William Sharp is a lecturer at Northeastern University and in private practice as a psychoanalyst. He is adjunct faculty at Wheelock College and the Boston Graduate School of Psychoanalysis, where he earned his doctorate in psychoanalysis.
