STUDYING PSYCHOANALYSIS

At BGSP, we use our understanding of unconscious dynamics to help solve problems of emotional suffering and destructive action. In this way, we free people to use their creative energy to live a satisfying life in cooperation with others.

As a graduate school, we teach students to actualize this personally and professionally by bringing psychoanalysis to bear on individual, social and cultural problems. BGSP's educational programs train psychoanalysts, counselors, interdisciplinary scholars, and social justice advocates. Through our Therapy Center, School Based Counseling internships, and work in the community, students and graduates work to help people directly improve their lives.

BGSP's programs are designed to provide an understanding of conscious and unconscious influences on human development and psychopathology, motivation, and interpersonal interaction. Advanced clinical programs teach the student how to use this understanding to practice psychoanalysis.

Courses at BGSP are structured to facilitate intellectual and emotional learning, using the classroom to learn both content and the process of resolving resistances to learning. Students report an intensity to their training that is unique to BGSP. Many students find it beneficial to slow their pace of study to a part-time schedule, which allows them to more fully integrate the course material, clinical work, their own personal analysis, and in many cases, outside employment.

ACADEMIC CALENDAR

BGSP's regular academic calendar consists of two semesters, Fall and Spring, as well as a Summer Session. The Fall Semester typically runs from the week after Labor Day through January, the Spring Semester typically runs from February through mid-June, and the Summer Session allows students to continue clinical supervision and coursework through the rest of June and July.

BGSP offers both 2-credit and 3-credit courses. Three-credit courses meet weekly for 15 weeks, while two-credit courses meet roughly every other week for the same period of time.

DOCTOR OF PSYCHOANALYSIS

BGSP is unique among both psychoanalytic training institutes and graduate schools in offering regionally accredited degrees in psychoanalysis, culminating in the Doctor of Psychoanalysis degree (Psya.D.). This program combines full training to become a psychoanalyst with academic and research studies leading to the doctorate. Psychoanalysts who have already been certified but would like to pursue the doctorate may apply for the Low-Residency, [Accelerated Track of the Psya.D. Program](#).

The Psya.D. program takes the psychoanalyst-in-training beyond the process of understanding how people develop their emotional and mental lives, into the realm of entering and intervening in the intrapsychic life of clients. The doctoral candidate explores the full range of character structures and psychopathology, integrating academic study with clinical work to understand patients' repetitions, defenses, resistances, and symbolic communications. In clinical supervision, candidates learn to use their own countertransference responses to understand the transference and to work constructively as psychoanalysts. Psychoanalytic research studies foster the candidate's discipline to examine clinical data systematically, strengthening the process of making valid inferences from observations.

Such work requires an investment not only of time and resources, but also of oneself. The journey for the analyst-in-training entails both the courage and commitment to develop a high level of emotional attunement, attainable only through the combination of seminars, self-examination in the training analysis, and intensive clinical supervision (all hallmarks of [BGSP's integrative approach to learning](#)).

Most students in the program are working while pursuing doctoral studies. Classes are scheduled during the evening or on Fridays to accommodate working students.

DEGREE GOALS

Upon completion of the Psya.D. program, students are expected to achieve a number of learning outcomes:

- 1) Students demonstrate understanding and mastery of psychoanalytic theory and ability to apply this understanding to clinical cases.
- 2) Students demonstrate understanding of their patients, including transference-countertransference dynamics, past and current resistances as they relate to character, and diagnosis and critical interventions for treatment.
- 3) Students demonstrate their ability to employ psychoanalytic technique appropriately in their clinical work.
- 4) Students demonstrate self-understanding and the ability to utilize their emotional responses to understand and work with their patients.

- 5) Students demonstrate the ability to integrate theory, empirical research, and clinical observation in executing and presenting a satisfactory dissertation research project.

TRAINING ANALYSIS

All doctoral candidates are required to undergo a personal training analysis concurrent with their studies.

The training analysis is an indispensable part of the training. It prepares candidates to develop their emotional repertoires in an effort to resonate with patients with a broad spectrum of emotional pathologies. It also increases the understanding of candidates' own conflicts and defenses and thus enables them to work more effectively with their cases.

Candidates choose an approved training analyst. Four hundred and fifty hours of training analysis are required for graduation. One hundred and fifty hours of group analysis may be applied to the four hundred and fifty required hours. Candidates are expected to be in analysis at a minimal frequency of once a week until graduation. Meeting at the minimum frequency is not sufficient to meet the 450 hour requirement for full-time students. Candidates may enter the program with approved prior training analysis hours, may meet more frequently, and/or, more typically, may proceed on a part-time basis while accruing hours of training analysis.

At least 70 hours of training analysis are required before beginning the Therapy Center internship.

COURSEWORK

Doctoral candidates gain a psychoanalytic perspective on both human development and clinical work. They learn about the development of the human psyche from infancy onward, study unconscious processes such as repetition, defenses, transference, resistance, and symbolism, and develop a psychoanalytic framework for understanding psychopathology across a wide range of diagnoses. Candidates explore advanced psychoanalytic theories from a range of perspectives, including those of Freud, Klein, Bion, Spitz, the theorists who followed them, and a range of other contemporary psychoanalysts. Advanced clinical seminars on resistance analysis, transference and countertransference, symbolism, and theory of technique inform candidates' work with patients. Courses in psychoanalytic research hone candidates' skills in systematic observation and inference and facilitate the student's work on the dissertation.

CLINICAL STUDIES

Doctoral Fieldwork Program

Prior to beginning psychoanalytic practice under supervision, doctoral candidates participate in a two-semester fieldwork program, which provides direct contact with regressed patients in mental hospitals or comparable settings, giving students the opportunity (a) to observe extremes of pathology at the earliest levels of fixation or regression and (b) develop basic skills for establishing a therapeutic relationship with regressed or narcissistic clients. The fieldwork experience fosters an ability to read the client's contacts, responses to stimulation, and symbolic communications while observing the emotional responses induced in oneself. These skills are basic to working with people at all levels of functioning. The fieldwork experience culminates in oral and written clinical presentations of cases.

Candidates accrue four hours of client contact per week in the fieldwork, and accrue 190 hours towards their graduation requirements. Accompanying the Fieldwork Program, candidates register for two semesters of PT 201 Fieldwork Group Supervision and one semester of PT 341 Fieldwork Individual Supervision.

Therapy Center Internship

After completing the fieldwork program, students apply to begin their [Therapy Center](#) Internship. The candidate works with a Therapy Center Fellow, who serves as the student's advisor and assigns patients. During the internship, candidates work psychoanalytically with cases under supervision for the duration of their studies. Candidates have at least four client contact hours per week for at least three years in order to accrue 560 case contact hours. The candidate works with at least three analytic cases at least weekly for two years each in order to graduate.

Each semester, candidates enroll in the clinical seminar appropriate to their level of training, beginning with Case Management and progressing through advanced psychoanalytic seminars, in which they remain until graduation.

Initially, candidates engage in group supervision. They then choose at least two individual supervisors. In the individual supervisions, cases are discussed for a minimum of 50 hours for each supervision, over the course of training. One control supervisor covers only the primary control case. (A "control case" is the term used for a case studied under close supervision.) Two hundred (200) hours of individual supervision is required for graduation. In order to ensure adequate coverage of cases, one hour of individual supervision is required for every four hours of case contact.

Candidates present their work with cases to the clinical faculty at two points during training: at the Clinical Case Review, and again at the end of their studies, at the Final Clinical Presentation. Following a minimum of 25 hours of PT 411 Control Analysis supervision, the candidate may schedule the Clinical Case Review. The Clinical Case

Review is a time for the candidate to gain formal feedback on clinical work, including case formulations, patient dynamics, and countertransference resistances, in order to work more productively towards the Final Clinical Presentation. Candidates receive recommendations for further training as well as an assessment of their readiness to work analytically on inference-making in doctoral research.

Following the Clinical Case Review, candidates continue in supervised practice and appropriate coursework while they work on the dissertation and prepare for the Final Case Presentation, required for graduation. A minimum of four years of clinical study and 750 direct client contact hours are required between the Fieldwork Program and the Therapy Center Internship. However, since candidates continue to work clinically under supervision and take clinical and/or research courses until they graduate, most students engage in substantially more hours of supervised clinical work before graduation.

QUALIFYING EXAM

After completing the first year of full-time coursework (or its equivalent) and the fieldwork program, candidates sit for the Qualifying Exam. In conjunction with assessment from first-year coursework and the fieldwork presentations, the Qualifying Exam is used to assess readiness for further doctoral study.

RESEARCH AND DISSERTATION

Candidates develop a dissertation question as they advance in their work with clinical cases and in their study of theory and research methods. They may begin to write a research prospectus at any point in training, usually in conjunction with a research course. Following a successful Clinical Case Review, the candidate presents a brief prospectus or concept paper to the Research Committee for initial discussion and approval of the research question, rationale, and method. The Research Committee assists the candidate in selecting readers to advise the candidate in the development of the dissertation proposal. Over the course of the dissertation research, the candidate works with three readers, one of whom might be an outside reader. When the proposal is fully developed, it is approved by the candidate's research committee, and the candidate undertakes the data collection, analysis, and writing of the findings and discussion. Doctoral dissertation projects may be single case studies, multiple case studies, theoretical studies, or studies applying psychoanalytic theory or technique to other kinds of observations and data, e.g., in the educational setting.

When the dissertation is complete and meets the readers' approval, the candidate schedules the dissertation defense with her/his dissertation committee in conjunction with the Research Committee. The doctoral candidate orally presents the dissertation research to the readers, the Research Committee, and the doctoral program faculty. All doctoral program faculty members

are given the opportunity to read the dissertation prior to the defense and vote on whether the research meets doctoral standards.

FINAL CLINICAL CASE PAPER AND PRESENTATION

The culminating capstone experience for psychoanalysts in training is the final clinical case paper and presentation. If the candidate's dissertation is a single case study, the dissertation serves as the final clinical case paper. Otherwise, the candidate prepares a written clinical case analysis and final presentation for graduation. The paper and presentation demonstrate how the candidate has met the relevant learning goals for clinical training.

The processes of both psychoanalytic research and preparation for the final case presentation are opportunities for candidates to learn a great deal about case or group dynamics, as well as one's own resistances as an analyst in training. Historically, candidates report that these endeavors, along with their training analysis, are both the most challenging and the most rewarding educational experiences in their journey to become psychoanalysts.

PROGRAM REQUIREMENTS

Students in the Doctor of Psychoanalysis degree program fulfill the following requirements to graduate:

1. 67 credits of required and elective course work
2. Satisfactory completion of the fieldwork program, case presentation, and written case study
3. Successful review of the Qualifying Exam
4. Completion of 1000 hours of supervised clinical experience, including:
 - a. Successful completion of the field placement (including at least 190 hours direct client contact) and approval of the fieldwork case presentation.
 - b. Successful completion of the Therapy Center clinical training. The candidate works with at least three analytic cases at least weekly for two years each in order to graduate (accruing at least 560 hours direct client contact). The minimum direct client contact hours from the field placement (190) plus the minimum direct client contact hours from the Therapy Center (560) equals the minimum 750 direct client contact hours required by ABAP.
 - c. Remaining hours of clinical experience, if any, may be fulfilled by group supervision, case conferences, and continuing clinical education
5. Completion of two semesters or more of PT 201 Fieldwork Group Supervision, two semesters or more of PT 211 Clinical Group Supervision, and 200 hours of individual supervision, including at least 12 hours of PT 341 Fieldwork Individual Supervision, 50 hours of PT 311 Individual Supervision with one supervisor and 50 hours of PT 411 Control Analysis Supervision with a second supervisor.

6. Satisfactory presentation of cases for Clinical Case Review after 25 hours of control supervision, demonstrating understanding of cases and current resistances including countertransference resistance.
7. Approval of the Final Clinical Presentation and case write-up (if the dissertation is not a single case study), demonstrating understanding of the case as well as use of self as a therapeutic personality.
8. Successful completion of the dissertation and oral defense to the faculty. The successful dissertation is a well-executed original research project demonstrating mastery of psychoanalytic concepts, a body of literature, research methodology, and valid inference making.
9. Minimum 450 hours of training analysis, of which 150 may be group analysis.

Upon graduation, candidates are also awarded the Certificate in Psychoanalysis.

Because of the emotional growth inherent in learning to analyze patients, becoming a psychoanalyst takes more than a checklist of requirements, and every candidate's progression will be unique. On a full-time basis, students take at least four years to graduate, but developing a robust caseload of psychoanalytic training cases can take more time. Almost all candidates reduce their studies to part-time status for one period of time or another, either to accommodate the rest of their lives, or to allow for a period of integration and analysis before proceeding onto additional work, such as completion of the dissertation. Furthermore, some students are more interested in the learning process than in the destination of graduation. Therefore, some students do attend full-time and complete the program in four years, and many more students study part-time and complete the program in closer to 8 years.

REQUIRED COURSES

PT 141 Maturation I: Early Development	3 credits
PT 142 Oedipal Development	2 credits
PT 151b Advanced Psychoanalytic Concepts	2 credits
PT 155 Dreams, Fantasy, and Symbolic Communication	2 credits
PT 156 Modern Psychoanalytic Theory of Technique	2 credits
PT 157 Transference and Countertransference	2 credits
PT 159 Unconscious Fantasy and Delusion	2 credits
PT 162 Later Freud and Contemporary Freudians	2 credits
PT 172 Psychoanalytic Research	3 credits
PT 187 Psychoanalytic Ethics	2 credits
PT 190a/b Orientation Group (<i>2 semesters</i>)	0.5 credit
PT 191 Psychoanalytic Psychopathology and Early Mental States	3 credits
PT 263-267 Contemporary Issues in Psychoanalysis (<i>one semester required</i>)	2 credits
PT 285 Inference Making	2 credits
PT 286 Ongoing Research Practicum	2 credits
PT 2609 Fieldwork Seminar (<i>2 semesters required</i>)	2 credits

PT 2610 Case Management Seminar <i>(2 semesters required)</i>	2 credits
PT 2611 Diagnosis and Case Formulation <i>(2 semesters required)</i>	2 credits
PT 2613 Case Study Intensive	2 credits
PT 2614 Advanced Resistance Analysis	2 credits
PT 2630 Comparative Case Seminar	2 credits
PT 2631 Comparative Clinical Theory: Early Mental States and Perversion	2 credits
PT XXX Elective	2 credits
PT XXX Elective	2 credits
PT 201 Fieldwork Group Supervision <i>(2 semesters required)</i>	0.5 credit
PT 211 Clinical Group Supervision <i>(2 semesters required)</i>	0.5 credit
PT 311 Individual Supervision	1 credit
PT 341 Fieldwork Individual Supervision	0.5 credit
PT 411 Control Analysis Supervision	1 credit
PT 340 Field Placement <i>(2 semesters required)</i>	
PT 440 Therapy Center Internship <i>(first semester)</i>	2 credit
PT 450 Therapy Center Internship <i>(remaining semesters)</i>	2 credit
PT 527/528/529/530 Directed Research <i>(10 credits minimum)</i>	0.5-3 credits

ELECTIVES

PT 143 Latency	2 credits
PT 144 Adolescence	2 credits
PT 147 Conflicts in Adulthood	2 credits
PT 149 Later Adult Life	2 credits
PT 150 Concepts of Group Psychoanalysis	3 credits
PT 152 Madness in Literature	2 credits
PT 154 Comparative Psychoanalysis	2 credits
PT 160 Narcissism and Aggression	2 credits
PT 183 Clinical Assessment	3 credits
PT 188 Clinical Work with Children	2 credits
PT 263-267 Contemporary issues in Psychoanalysis <i>(additional semesters)</i>	2 credits
PT 2612 Advanced Clinical Seminar	2 credits
PT 283 Proposal Writing	2 credits

Courses in the Psychoanalysis, Society, and Culture Program may also be taken for elective credit. For a complete listing of courses in the Psychoanalysis, Society, and Culture program, please see the Psychoanalysis, Society, and Culture Catalog.

CERTIFICATE IN PSYCHOANALYSIS

The Certificate program is designed for the student who is interested in full clinical training as a psychoanalyst, who does not want to pursue the Doctorate. Training at the Certificate level is very similar to the Doctoral program, with extensive clinical and research studies, but all Certificate students complete the single case study final project in lieu of a dissertation. Students follow a similar path through coursework, fieldwork, Therapy Center internship, and training analysis, as outlined in the information about the Doctor of Psychoanalysis program. Please refer to the Psya.D. program for required courses, clinical studies, final case presentation, time to graduation, and other information.

Certificate students are expected to achieve the same learning outcomes as doctoral students, with the exception of the dissertation. Certificate students are expected to demonstrate the ability to integrate theory, empirical research, and clinical observation in executing and presenting a satisfactory single case study research project.

SINGLE CASE STUDY RESEARCH PROJECT

After completion of a minimum of 25 hours of control analysis, required coursework, and a successful Clinical Case Review, students begin the single case study for the final project. The student submits a brief description of his or her case and research interest to the Research Committee. The Research Committee gives feedback on the proposed study and helps the student find a reader who serves as chair of the student's research committee. The chair helps the student develop a narrative of the case to be studied, identify a research question, complete a literature review and develop a methodology for the research project, as well as select two additional readers to advise on and approve the project. The three person committee approves these first three chapters, which constitute the proposal for the single case study, before the student proceeds to in depth data analysis and articulation of findings, including inferences made regarding unconscious dynamics and fantasies, backed up with evidence from the clinical process.

When the project is complete, the candidate orally presents the final project to the readers, the Research Committee, and the Certificate program faculty and students. All Certificate program faculty members are given the opportunity to read the final project prior to the presentation and vote on whether the project meets clinical and research standards for the Certificate in Psychoanalysis.

The single case study is an opportunity for students to learn a great deal about the dynamics of one case, the inner workings of an individual, and their own resistances as psychoanalysts in training. Historically, students report that researching the single case study, along with their training analysis, has been both the most challenging and the most rewarding educational experience in their journey to become psychoanalysts.

SAMPLE FULL-TIME PROGRAM OF STUDY

BGSP offers courses in such a sequence that students entering in the Fall semester may complete the following full-time course of study. Not all students are advised to take a full-time course load, and additional time is often required for the internship or dissertation. The layout presented below can help students identify their required courses and plan when their required courses will be offered next.

FALL, FIRST YEAR

PT 141 Maturation I: Early Development	3 credits
PT 191 Psychoanalytic Psychopathology and Early Mental States	3 credits
PT 2609 Fieldwork Seminar	2 credits
PT 190a Orientation Group	
PT 201 Fieldwork Group Supervision	
PT 340 Field Placement	
	8 credits

SPRING, FIRST YEAR

PT 142 Oedipal Development	2 credits
PT 151b Advanced Psychoanalytic Concepts	2 credits
PT 2609 Fieldwork Seminar	2 credits
PT 190b Orientation Group	
PT 201 Fieldwork Group Supervision	
PT 341 Fieldwork Individual Supervision	
PT 340 Field Placement	
	6 credits

SUMMER, FIRST YEAR

PT 201 Fieldwork Group Supervision and Field Placement (remaining hours)

FALL, SECOND YEAR

PT 155 Dreams, Fantasy, and Symbolic Communication	2 credits
PT 162 Later Freud and Contemporary Freudians	2 credits
PT 2610 Case Management Seminar	2 credits
PT 211 Clinical Group Supervision	
PT 440 Therapy Center Internship (first semester)	
	6 credits

SPRING, SECOND YEAR

PT 156 Modern Psychoanalytic Theory of Technique	2 credits
PT 172 Psychoanalytic Research	3 credits
PT 2610 Case Management Seminar	2 credits
PT 211 Clinical Group Supervision	
PT 311 Individual Supervision (minimum every other week)	
PT 450 Therapy Center Internship (second semester and beyond)	
	7 credits

FALL, THIRD YEAR

PT 157 Transference and Countertransference	2 credits
PT 159 Unconscious Fantasy and Delusion	2 credits
PT 2611 Diagnosis and Case Formulation	2 credits
PT 311 Individual Supervision (minimum weekly)	
PT 411 Control Analysis Supervision (minimum every other week)	
PT 450 Therapy Center Internship	

6 credits

SPRING, THIRD YEAR

PT 187 Psychoanalytic Ethics	2 credits
PT 2630 Comparative Case Seminar	2 credits
PT 2611 Diagnosis and Case Formulation	2 credits
PT 311 Individual Supervision (minimum weekly)	
PT 411 Control Analysis Supervision (minimum every other week)	
PT 450 Therapy Center Internship	

6 credits

FALL, FOURTH YEAR

PT 263-267 Contemporary Issues in Psychoanalysis	2 credits
PT 2613 Case Study Intensive	2 credits
PT 2631 Comparative Clinical Theory	2 credits
PT 311 Individual Supervision (minimum weekly)	
PT 411 Control Analysis Supervision (minimum every other week)	
PT 450 Therapy Center Internship	

6 credits

SPRING, FOURTH YEAR

PT 285 Inference Making	2 credits
PT 2614 Advanced Resistance Analysis	2 credits
PT XXX Elective	2 credits
PT 311 Individual Supervision (minimum weekly)	
PT 411 Control Analysis Supervision (minimum every other week)	
PT 450 Therapy Center Internship	

6 credits

YEAR FIVE AND BEYOND (until graduation)

PT 26XX Clinical Seminars (required until graduation)	2 credits
PT XXX Elective	2 credits
PT 286 Ongoing Research Practicum	2 credits
PT 311 Individual Supervision	
PT 411 Control Analysis Supervision	
PT 450 Therapy Center Internship	

6 credits

PT 527/528/529/530 Directed Research (minimum 10 credits) **10 credits**

Total academic coursework: **67 credits** + Therapy Center and Supervision

COURSE DESCRIPTIONS

ORIENTATION

PT 190a/b Orientation Group for First Year Students (0.5 credit)

All first year clinical students participate in a process orientation group providing a forum for discussion of the first year experience and introduction to modern psychoanalysis.

MATURATION

Maturation courses investigate normal and pathological development, as well as theories of regression and fixation. Students examine specific emotional conflicts as they arise in stages of development as well as in transference regressions.

PT 141 Maturation I: Early Development (3 credits)

This course begins by examining the earliest phases of the development of the mind. Students explore the transformation of drives through Freud's psychosexual stages (the oral, anal, urethral, phallic and oedipal stages). The class studies how these stages influence the development of character and early communication patterns, reflected by early socialization struggles and interactive processes. Students use concepts such as the role of sexual and aggressive drives and their fusion, the capacity to distinguish self from other as well as separate objects, the importance of the family, and the role of fantasy and language to understand maturation. Students explore the relationship of psychoanalytic concepts of development to ethological, cognitive, and psychosocial developmental theories and to clinical work.

PT 142 Oedipal Development (2 credits)

The course continues the focus on human development, further studying the psychosexual stages, development and resolution of the Oedipal stage, developing separation and individuation within the family and cultural context, moving into the latency stage. Concepts of drive arousal, drive fusion, object relations, screen memories, character development and the role of fantasy in mental development will be addressed.

PT 143 Latency (2 credits)

Elective

This course focuses on the operation of the drives during latency. This includes normal and abnormal patterns, resolution of the Oedipal phase, consolidation of character traits, and use of regression. The course continues the study of the maturational process as it unfolds in the development during the grade school years and considers case material from work with school aged children.

PT 144 Adolescence (2 credits)

Elective

In adolescence, the struggle toward maturation causes psychic turmoil. The goal is to study maturation as it unfolds in the development of an individual's body and mind; to explore

adolescent drive issues, conflicts and resolution; to understand the second reworking of early issues within the framework of greater biological maturity. As unresolved early childhood conflicts reemerge, resistances to adulthood can lead to various social and psychological problems. This course explores adolescent conflicts, difficulties with object relations and possible solutions.

PT 147 Conflicts in Adulthood (2 credits)

Elective

This course identifies the central developmental tasks and inherent conflicts typical of the young adult. Young adults struggle with both pregenital and genital aims, including the repetition of incestuous longings and the fear of intimacy. This course addresses love, guilt, and shame as they relate to conflicts around intimacy and aggression and the efforts individuals engage in to make successful relationships, attain individual identities, and seek satisfying work.

PT 149 Later Adult Life (2 credits)

Elective

This course explores issues and conflicts appearing during middle and later adulthood. The class addresses midlife conflicts, potential for “crises,” physical and emotional changes over the later years, and relationships among multiple generations.

PSYCHOANALYTIC THEORY

This area of study gives students a broad foundation in classical and contemporary theories of psychoanalytic motivation.

PT 150 Concepts of Group Psychoanalysis (3 credits)

Elective

A study of the modern psychoanalytic treatment of groups, families, and couples. This course considers the phenomenology of the setting, the handling of resistances, and the role of management of impulses in group interactions. Modern analytic techniques for work with groups are emphasized through demonstration and course curriculum.

PT 151b Advanced Psychoanalytic Concepts (2 credits)

This course examines fundamental concepts in psychoanalysis applied to clinical work, including unconscious motivation, drive theory as manifested in characterological dynamics, object relations, conflict and defense, transference and countertransference and the repetition compulsion. These concepts are explored as discussed by Freud and modified by more recent theorists.

PT 152 Madness in Literature (2 credits)

Elective

Psychoanalytic understanding of severe pathologies and character disorders will be illustrated using characters from novels and short stories. Students examine character patterns, normal and pathological, developed to deal with instinctual life as a background to deeper

understanding of pathological phenomenon such as breaks with reality, delusional states, compulsive patterns, intense anxieties, mania and depression, and mixed symptoms pictures.

PT 154 Comparative Psychoanalysis (2 credits)

Elective

This course acquaints students with the different schools of thought in psychoanalysis and studies how their underlying premises affect their theoretical and clinical thinking, including their view of concepts such as transference, countertransference and resistance. Students will learn the contributions of classical Freudians, Kleinians, Jungians, ego psychologists, object relations theorists, self psychologists, modern psychoanalysts, Lacanians, and interpersonal and intersubjective psychoanalysts. The course explores how concepts of drive, object, and self combine to form a current motivational theory and affect how analysts from different schools listen to and intervene with their analysands.

PT 155 Dreams, Fantasy, and Symbolic Communication (2 credits)

This course acquaints students with the language of the unconscious and primary process as it appears in dreams, fantasy, delusions, myth, symptoms, and creative works. The course examines the basic mechanisms of dream formation (e.g., condensation, reversal, displacement, symbolization, secondary revision), beginning with the study of Freud's work on dream interpretation. The course then explores more recent research on sleep and the nature and functions of dreams. Students develop skill in recognizing and understanding unconscious communication and motivation.

PT 156 Modern Psychoanalytic Theory of Technique (2 credits)

Students examine the evolution and current status of modern analytic approaches to treatment. Particular attention is given to verbal and nonverbal interactions related to induction and methods for facilitating and working through narcissistic and object transferences.

PT 157 Transference and Countertransference (2 credits)

This course encompasses an in depth study of the concept of transference and countertransference resistances with readings from the current and historical literature. Patient material and class process will be used to illustrate concepts of transference and countertransference resistances. This class covers how the narcissistic transference and induced feelings may further or interfere with the patient and analyst having all possible feelings as well as progression to object transferences.

PT 159 Unconscious Fantasy and Delusion (2 credits)

This course studies the nature of unconscious fantasy and how it manifests in behavior and in clinical work as well as dreams, art, science, myth, and cultural phenomena. Students will examine the relationship between the enactment of unconscious fantasy and delusion and discuss implications for research.

PT 160 Narcissism and Aggression (2 credits)

Elective

This course provides an in depth study of the relationship between narcissism and aggression, with particular attention to those disorders in which self-hate predominates over self-love. The meaning of the narcissistic defense is clarified, and the treatment techniques that have been devised to work with narcissistic disorders are discussed with reference to clinical material. Class process is used to illustrate concepts.

PT 162 Later Freud and Contemporary Freudians (2 credits)

This course traces the development of Freud's dual drive theory, focusing on his later formulations, and compares these conceptualizations with those of contemporary theorist operating within a Freudian framework.

PT 263-267 Contemporary Issues in Psychoanalysis (2 credits)

In this course, a topic of contemporary interest is chosen as the focus of, e.g., the nature of therapeutic action, gender and psychoanalysis, advanced comparative theory, particular treatment issues. A different topic may be the focus each time the course is offered.

RESEARCH

The Research curriculum presents basic research design and specific methodological issues for psychoanalytic research. It guides the formulation of questions for study, from the Master of Arts level through the final project in the Certificate program and dissertation in the Psya.D. program.

PT 172 Psychoanalytic Research (3 credits)

This course introduces students to selected psychoanalytic research methods that have gained general acceptance in the field. It explores advantages, disadvantages, limitations, sources of error, and bias associated with various research methods. The course examines what is basic to psychoanalytic inquiry in the areas of study design, data collection and processing, distinguishing among inferences, assumptions, and observed events. Students become familiar with designing methodology for the single case study and problems collecting and processing psychoanalytic data.

PT 283 Proposal Writing (2 credits)

Elective

Prerequisite: At least one year of Candidacy Level studies

This project-focused course is designed to cover the elements of the proposal and relevant readings on methodology, as well as sample projects. Students develop research questions relevant to their area of interest, pursue their review of the literature, and develop a methodology.

PT 285 Inference Making (2 credits)

Prerequisite: By Recommendation after Clinical Case Review

One of the biggest challenges in psychoanalytic research is the process of making valid inferences from data and observations collected during psychoanalytic work and interviews. Students consider how to articulate assumptions about the unconscious, back up inferences with data, and draw valid conclusions. The class discusses sample and ongoing projects.

PT 286 Ongoing Research Practicum (2 credits)

Prerequisite: By Recommendation after Clinical Case Review

This ongoing course provides students a forum to discuss methodology, use of the literature, questions for research, and using data to make inferences while focusing on their developing research projects. Students may elect to register for PT 285, Inference Making, when ready to organize and present findings.

PT 527/528/529/530 Directed Research (0.5-3 credits)

Minimum of 10 credits required

Candidates work individually with a research supervisor who assists them in developing and completing a research proposal, developing methodology, and collecting and interpreting data. During the course of the single case study or dissertation research, the student signs up for directed research with two additional readers approved by the research committee.

CLINICAL STUDIES

PT 183 Clinical Assessment (3 credits)

Elective

This course introduces students to clinical interviewing, conducting an intake, and arriving at an initial diagnosis over the course of one or more sessions. The difference between psychoanalytic and DSM diagnosis and the process of arriving at each is reviewed. Students learn psychological measures and intake forms commonly used in mental health clinics, schools, courts, and private agencies, including widely used tests of intelligence, aptitudes, vocational interests, and personality dimensions. The course examines issues of reliability, diversity, limitations of the tests, and ethical practice in relation to the validity of assessments. Students explore the relationship between assessment, findings, and treatment planning.

PT 187 Psychoanalytic Ethics (2 credits)

This course focuses on the clinical ethical issues that have arisen within psychoanalysis since its inception. Such issues as "wild" analysis, extra-analytic contact, neutrality, countertransference, the use of induced feelings, parameters, working with enactment, and third-party payment will be discussed in terms of case examples. The special circumstances that occur when analysts work in non-analytic settings will be considered from an ethical perspective. The course considers the goals of analysis and the best interest of the patient as guiding principles in studying ethics.

PT 188 Clinical Work with Children (2 credits)

Elective

This course examines theory and technique in working with children in therapeutic settings, including child diagnosis, childhood psychopathology and therapeutic techniques. The class specifically explores the use of play and talking therapy techniques, working with children individually and in groups.

PT 191 Psychoanalytic Psychopathology and Early Mental States (3 credits)

This course covers psychodynamic formulations of psychopathology with a focus on early mental states and character disorders and compares the psychodynamic understanding with the DSM formulations. Case material and implications for treatment are discussed.

PT 201 Fieldwork Group Supervision (0.5 credit)

Students discuss cases from the field placement in groups of three. This course is designed to facilitate understanding through listening and identifying dynamics. Students submit case summary process reports of sessions. Required for duration of Field Placement.

PT 340 Field Placement

In at least 600 hours of field placement activity, the student meets with at least four weekly patients, attends activities in the facility including administrative supervision, and conducts administrative work on cases, becoming familiar with individual and institutional character.

PT 341 Fieldwork Individual Supervision (0.5 credit)

In the second year of field placement, students are required to engage in an individual supervision on fieldwork cases in addition to the PT 111 group supervision, providing an opportunity to focus in depth on one or two cases.

PT 2609 Fieldwork Seminar (2 credits)

Two semesters required

This course uses an understanding of severely regressed levels of psychopathology (psychosis, borderline conditions, narcissistic disorders) as a basis for working in the fieldwork placement utilizing modern psychoanalytic technique. Emphasis is on establishing a narcissistic transference and managing tension states utilizing an understanding of contact function, and emotional and symbolic communication at this level of functioning.

PT 2610 Case Management Seminar (2 credits)

Two semesters required

Students present their experience with patients to learn about case management issues at different stages of treatment, including how to: establish a contract; promote understanding of the patient's unconscious dynamics as revealed through verbal and non-verbal communications; regulate the tension level in the session; study resistances (defenses) and their function in the patient's psychic economy; approach diagnosis; examine and identify transference and countertransference manifestations and learn how to deal with them; practice integrating theory and clinical material; develop interventions based on an understanding of the patient's dynamics and the therapist's feelings; and resonate with the patient.

PT 2611 Diagnosis and Case Formulation (2 credits)

Two semesters required

Prerequisites: A minimum of two semesters of PT 2610 and PT 2610 instructor's recommendation.

The focus of this course is on recognition of characterological resistances and repetitions in both patients and therapists that may impede therapeutic progress. Students learn to identify and work with these resistances and use this understanding as a basis for diagnosis, case formulation, and design of interventions.

PT 2612 Advanced Clinical Seminar (2 credits)

Elective

Prerequisites: Completion of PT 2610 and PT 2611, completion of Clinical Case Review, and instructor's recommendation. Usually all other required coursework has been completed.

The course focuses on understanding and working with resistance, particularly intractable resistance and factors in the analyst and the patient that contribute to the intractability.

PT 2613 Case Study Intensive (2 credits)

Prerequisites: Completion of PT 2610 and PT 2611

Candidates study one case during the semester, with attention to diagnosis, transference, countertransference, resistances and technical considerations. Please come to the first class prepared to talk about a Therapy Center psychoanalytic case to begin case selection and supporting assignments.

PT 2614 Advanced Resistance Analysis (2 credits)

Prerequisites: Completion of PT 2610 and PT 2611

This clinical seminar will concentrate on the theoretical and technical elements of resistance analysis in psychoanalysis. Using case material from class members, the workshop format will help students develop an in depth understanding of how this concept guides our clinical work. Contrasting techniques from other schools of thought will help highlight this fundamental approach.

PT 2630 Comparative Case Seminar (2 credits)

Students take turns presenting cases to BGSP and guest faculty representing different theoretical perspectives or "schools" of psychoanalysis. The same case(s) are considered in light of at least three different theoretical approaches. Similarities and differences in theoretical perspectives are discussed and their implications for treatment and clinical research are considered.

PT 2631 Comparative Clinical Theory: Early Mental States and Perversion (2 credits)

This course examines psychopathology of severely regressed states from the perspective of psychoanalytic theory and case study. Psychiatric understanding of etiology and function is contrasted with and augmented by the psychodynamic understanding of symptoms, core conflicts, and characteristic defenses in psychotic, affective, and somatic disorders. Implications for diagnosis and treatment are discussed.

PT 211 Clinical Group Supervision (0.5 credit)

Two semesters

Candidates new to the Therapy Center present up to three cases to a supervisor. Emphasis is placed on early resistances in psychoanalytic treatment. Students submit monthly case process reports. Groups of three. Required for two semesters.

PT 311 Individual Supervision of Psychoanalytic Cases (1 credit)

Prerequisites: Completion of first year internship, two semesters of PT 211, written approval of Fellow

Students select an individual supervisor for the study of their Therapy Center cases. The course requires a summary of the supervisory process for each case covered at the end of the semester. Students meet with their supervisor on a once or twice a month basis, depending on the number of cases covered. Up to three cases may be presented, with a concentration on one case. Fifty hours with one supervisor required.

PT 411 Control Analysis Supervision (1 credit)

Prerequisites: Recommendation of the Fellow and written approval of the Dean

The candidate presents one case to an approved control analyst, a minimum of one hour of supervision for every four hours of patient contact. In-depth study of the single case focuses on resolution of resistances in the treatment and comprehensive understanding of the patient's dynamics. A minimum of fifty hours of PT 411 is taken with one analyst other than the PT 311 supervisor or the training analyst. At the end of each semester, the student submits a summary of the supervisory process.

PT 440/450 Therapy Center Internship (2 credits)

Prerequisites: Written acceptance to the internship

Interns meet weekly with their Therapy Center Fellows to discuss any issues relating to their academic program, as well as administrative issues relating to their clinical work. They also have the opportunity to practice presenting cases. Students are assigned a minimum of three cases and conduct intake interviews under the administrative supervision of their Fellows. Third-year interns may be invited to serve as mentors for newer interns.

The Boston Graduate School of Psychoanalysis may withdraw, add or modify courses as necessary.

ADMISSION

Criteria for Admission

Application to the Doctor of Psychoanalysis degree program is open to applicants who have earned a master's degree, most often in a mental health field, and who have clinical experience. The School expects the applicant's previous graduate work to include coursework in somatic factors, socio-cultural influences and diversity, research methods in human sciences, and psychopathology. Applicants with a related master's degree who do not meet all pre-requisites may be admitted with additional course or clinical requirements. Applicants with a master's degree or CAGS in Psychoanalytic Psychotherapy from BGSP may waive certain coursework and field work in consultation with the admissions team and advisor.

BGSP admits students of any race, color, national origin, and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the School. It does not discriminate on the basis of race, color, national origin, ethnic origin, gender, sexual orientation, disability, age, creed, or employment status in administration of its educational policies, admission policies, scholarship and loan programs, and other School-administered programs.

Admission Process

Qualified applicants demonstrate their motivation and capacity to understand self and others as evidenced in their written application and admissions interviews; their readiness to undertake graduate level academic study; and their motivation to engage in emotional and intellectual learning.

In order to apply, prospective students submit to the Director of Admissions the completed application, the application fee, and supporting materials, which include official copies of undergraduate and graduate transcripts, three current letters of reference, a statement about interest in the program, and an academic writing sample. For admission to the Psya.D. program, the academic writing sample should be a Master's paper or its equivalent. Applicants who are non-native speakers of English may be asked to submit scores from the Test of English as a Foreign Language (TOEFL). Those educated outside the United States also submit transcripts to a credential equivalency service.

The application is complete once the above materials are submitted and the file is then reviewed by the Admissions team. Those applicants selected for further consideration are scheduled for three interviews with three faculty members. The interview is an opportunity for the applicant to express their personal interest in psychoanalytic study, and to learn more about the Graduate School and its programs. During the interview process, the applicant is asked to write a brief response to a psychoanalytic text. The Admissions Committee then reviews all components of the applicant's file to make an admission decision.

Applicants who have completed graduate work in psychoanalysis may request equivalency at the admission interviews. Equivalency requests should be accompanied by documentation

including syllabi of courses to be evaluated. Students seeking credit for hours with analysts who are members of the Society of Modern Psychoanalysts or members of comparable psychoanalytic accrediting bodies may submit their analyst's credentials to the Dean of Graduate Studies for review. Prior and current hours with qualified training analysts may be counted toward the graduation requirement.
